

With a humble start in 1995, to becoming an indispensable leader in the region for distribution of cables, industrial lighting fixtures, and electrical systems, we at Dallas Trading have come a long way! With the guidance and visionary thinking of our founder, Mr Prakash Ahuja, we have won the trust of our customers as a UAE based start-up, with a dependable source of electrical products for trade & industry, that provides genuine products with prompt customer service.

We started off with our office cum warehouse in DIP-Dubai, and now have offices in Qatar, Oman

and Bahrain too. Proudly one of the first electrical companies, who has branches in all these countries, with a working space of over 16000 sqft and a team strength of over 30.

Along with our future visions, we also stay close to our roots with a customer-first approach. From our family-owned roots, we've learned that close relationships with customers, suppliers, and communities go a long way! These relationships make us great innovators. Today we enjoy a leadership position in value distribution business and represent the top-most global brands

including PCE, Raychem, Barton, Hager, ABB, HEX and 3M to name a few.

As an ISO 9001:2008 accredited organization in UAE, Oman and Qatar, we have established processes for all business activities, and this gives us the ability to provide consistent level of customer service. Our future is secured with the knowledge that we have differentiated ourselves by offering the best of products with unparalleled levels of customer empathy and service.

Power Cable Accessories

Dallas Trading Co. LLC is also proffesional in Designing, Assembling of Switchgear and control Panels for various type of Industries, Construction, Power Distribution and Automation Systems. In the hi-tech field of Industrial control and automation, we are involved in Electrical & Electronic Controls, Automation and related areas.

- Rigid and flexible steel conduit and fittings
- Trunking, adaptable boxes
- Switch and socket boxes
- Cable management installation equipment

Barton - UK

Barton Engineering has a 130-year long reputation as a leading British brand associated with the manufacture and supply of premium quality cable management products.

Acquired by the Liberty House Group at the end of 2015, the Barton range is synonymous with performance and exceptional technical support across all its products.

- Industrial plugs and sockets
- Distribution boxes
- Mobile power distributors for construction sites
- Testing equipment
- Switches
- · Including product development and tool making

PCE Austria

Those who want to win the global market for themselves in a sustainable way must not orient themselves to limits, but to possibilities. PC Electric is guided by this principle in the development, production and distribution of extremely high-quality industrial plugs and sockets. At the forefront of the industry - the base for this success is as broad as it is robust. It is built on more than 900 superbly trained employees who have established an extraordinary high level of quality and innovation with all their commitment. PCE has vide range of product to serve.

- · Low voltage Resin joint kits straight
- · Low voltage joint kits Branch
- Low voltage straight heat joint kits
- Low voltage termination heat joint kits

Raychem Tyco UK

TE Connectivity Raychem brand was acquired by Tyco International in 1999. TE Connectivity Raychem brand manufactures products for major market segments including aerospace and defense, automotive, telecommunications, energy networks, consumer electronics and transportation.

We offer Raychem Resin Joint kits for Low voltage termination for Armoured and unarmoured cables.

- Breaker compartment
- Bus compartment
- Cable compartment

Eaton

Electrical switchgear refers to a centralized collection of circuit breakers, fuses and switches (circuit protection devices) that function to protect, control and isolate electrical equipment. The circuit protection devices are mounted in metal structures. A collection of one or more of these structures is called a switchgear line-up or assembly. Switchgear is commonly found throughout electric utility transmission and distribution systems as well as in medium to large sized commercial or industrial facilities. Standards for electrical switchgear are defined by IEEE in North America and by IEC in Europe and other parts of the world.

- LV and HV Copper crimping Lugs
- Cable Glands for LV and HV cables
- Cable Cleats PVC and Aluminium
- Earthing Accessories

Simplex Cables (UK) Ltd

Simplex Cables UK Ltd's most popular range of cable glands include 100% Extruded, CNC-machined metal and special PVC glands to meet the most stringent environment conditions for outdoor, indoor and fire-rated applications.

- Energy distribution
- · Switch gear components
- · Wiring accessories

Hager

Hager Group is a leading supplier of solutions and services for electrical installations in residential, commercial and industrial buildings. Together with our customers from industry and the electrical trade, we are working on future topics such as electro-mobility with charging stations for residential buildings as well as for public infrastructures, building automation and on the networking of energy-efficient housing, which will provide greater comfort while requiring less energy consumption. The link between many of these technologies will be the distribution board, the product with which we have achieved our growth.

- DECONTACTOR™ = plug + industrial switch (up to 400 A),
- Multi-contact sockets (up to 37 contacts)
- Industrial connectors (up to 600 A)
- Single pole connectors (up to 750 A with pilots),
- Socket, distribution, break-out, junction, bypass and command/co

Marechal Electric - France

Founded in 1952, the MARECHAL ELECTRIC Group counts among the major players in Low Voltage LT electrical connection systems, offering the best products and local services to the most demanding customers. The company is specialized in the manufacture of low voltage electrical connectors from 5A to 700A, as well as electrical solutions for potentially explosive atmospheres through the TECHNOR® brand. Our customers benefit from MARECHAL® products designed to ensure safety, durability, performance, ease of use and energy efficiency. Marechal Products are available for non-ATEX or ATEX environments (IECEx) Areas 1, 21, 2, 22

- LED Lighting fixtures
- · Conventional Lighting
- Ex Enclosures
- Control systems

Technor Italsmea

The company is specialized in the manufacture of low voltage electrical connectors from 5A to 700A, as well as electrical solutions for potentially explosive atmospheres through the TECHNOR® brand. Our customers benefit from MARECHAL® products designed to ensure safety, durability, performance, ease of use and energy efficiency. The company offers products under two complementary brands MARECHAL® and TECHNOR® with the same level of quality requirement worldwide. Committed to this approach, MARECHAL ELECTRIC has remained since 1952 an example of success, offering products of unrivalled quality, resulting from the research and development that make the reputation of the French electrical industry.
